Pasco County Utilities Repairs Ruptured Force Main

~~Response and repair activities are underway in the Village Brook Community~~

WESLEY CHAPEL, FL ---- The [Pasco County Utilities](#) (PCU) Operations & Maintenance Department (O&M) is actively working to repair a ruptured sewer force main in the Village Brook Community of Wesley Chapel near Gateway Boulevard. **Residents will not experience an interruption in service** or detours as a result of the repair work, and **there is no risk to public health**. However, please be advised that Pasco County Utilities crews are expected to be onsite through next week. A completion date for the emergency repair is not known at this time.

To ensure safety and odor issues are addressed, PCU activated a team to isolate and stop the spill caused by a ruptured 16” sewer force main.

“The activated response team was able to divert flow of the collection system and use vector collection trucks to retrieve any spilled liquids,” said Utilities Operations & Maintenance Director Jason Mickel.

All regulatory entities have been notified including State Watch Office, State Warning Point, the Florida Department of Environmental Protection and the Florida Department of Health.
